COLLECTION 2019

our doors

THE CHOICE YOU MAKE IN SELECTING YOUR NEW INSULATED COMPOSITE DOOR IS IMPORTANT, AS YOU WANT IT TO SERVE YOU WELL FOR MANY YEARS TO COME.

appearance

Your door must look good and be aesthetically pleasing. Think about:

- Door Style
- Door Colour
- Choice of Decorative Glass

security

All important in protecting your home from unwanted visitors.

You need:

- Impact resistant GRP with rigid polymer subframe
- High-density polyurethane foam core
- Proven to PAS24 Security standard, essential for achieving 'Secured by Design' endorsement*

durability

A must to keep the elements at bay! It must have:

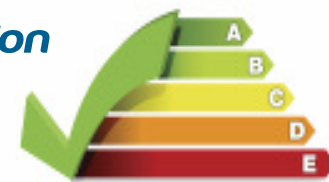

- A waterproof door leaf
- A high performance, weather resistant, glazing system
- Weather performance, proven to BS6375 - 1 Classification, for weather tightness, air, wind and water

heat insulation

Keeping your home insulated and your bills down. You require:

- A high performance insulating core
- High performance insulated glass units
- A door that exceeds Approved Document L of the Building Regulation requirements

sound insulation

Protecting you from external noise.

It must have:

- Baffling against noise with a high performance insulating core
- At least Outdoor-Indoor Transmission Class (OITC): 26db
- At least Sound Transmission Class (STC): 29db

durability

A door with pedigree - tried and tested for over 20 years. It needs:

- Strength from its construction
- High impact resistant door skins
- Stability, whatever the weather conditions

integral venetian blind

This integral venetian blind is cleverly encapsulated within the insulated glass cavity of this door to provide a zero maintenance blind. The blind can be raised, lowered and easily tilted using the unobtrusive fingertip control on the edge of the frame.

Tilt Tab
Choose whether
to have the
blinds open or
closed

Our integral venetian blinds are handed for left or right, allowing the blind to be raised and tilted by control tabs on the hinge side of the door and not interfere with the operation of the door handle.

Raise Tab
Choose whether
to have the
blinds raised or
lowered

stable door option

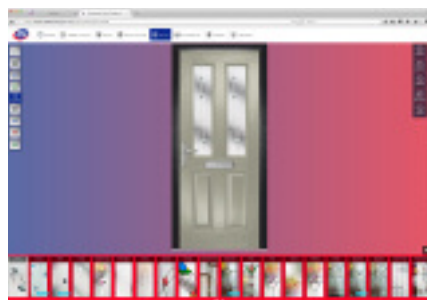

All Thoresby Doors are also available in a Stable Door option.

It is not, as so often is the case, a Cottage door that has been cut to form the upper and lower portions. It is constructed specifically with a mid-rail so that when cut through, it forms two leafs. Each leaf is completely surrounded by a rigid subframe providing stability and security, as well as weather protection.

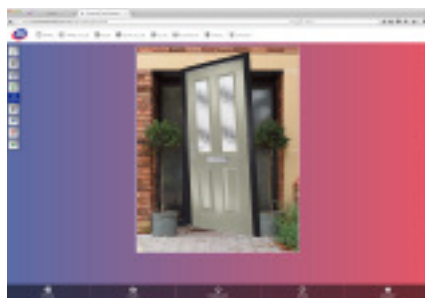

interactive door builder

1. Choose your door style, frame style and colour options

2. Choose your decorative glass design

3. Manipulate your design into one of our standard backgrounds or upload an image of your customer's house

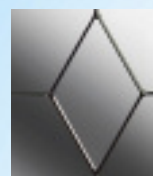

4. Download or share your completed image

Our interactive door builder can incorporate the full range of decorative glass from our catalogue, as well as all 43 door colour options into more than 30 door styles, ranging from traditional to contemporary. We calculate that the Door Configurator can design over 10,000 different combinations of glass, door styles and colours, providing several features not available on any other door configurators in the market, such as the ability to view the door on a range of standard entranceway backgrounds or with the customer's own property photograph; and a useful tool to send the configured door design via email to be recreated on the recipient's browser.

Textured Backing Glass

With our Diamonds and Fleur decorative glazing designs, we recommend that a textured backing glass is used to add an extra level of privacy. We offer the complete range of Pilkington textured glass and you can also specify any of these textured backing glasses for use with our side panel and top light frames.

how to keep your door looking great for longer

To prolong the life of the surface, a small amount of care and attention is needed. How often will depend on where you live. In a coastal or heavily industrialised area or near a main road, cleaning may need to be more often. We recommend that you only use warm soapy water (washing up liquid is suitable) with a lint-free cloth and wipe dry with a soft clean cloth.

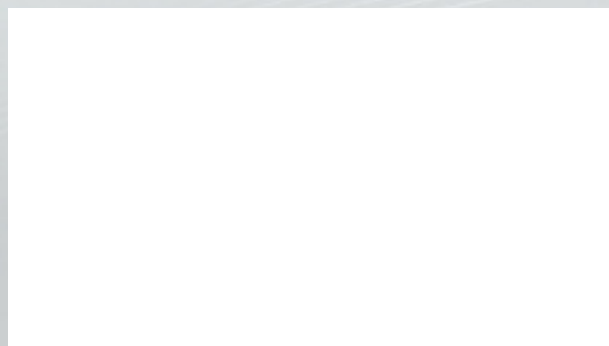

PLEASE DO NOT...

- Use abrasive cleaners or scouring pads
- Use pressure washers or steam cleaners
- Apply any type of bleach or solvent
- Apply any adhesives of any type or tack
- Have any contact with any sharp objects

If your door suffers accidental everyday damage, such as dents or scratches, then various surface maintenance kits are available.
